

THE RIGHT CHOICE

Your Local and Independent Security Specialists

ASC has built a solid reputation for protecting property and saving lives for over twenty years in the DC area. **Over one-third of ASC customers have had a previous experience with a larger company like ADT or Brinks, but came to us for superior customer service and monthly savings on their monitoring fees.** ASC's hallmark tradition of personalized customer care and service was established in 1985 and remains the key reason for our growth and customer loyalty.

Our UL Approved Central Station provides daily round-the clock monitoring of burglary, fire, medical and duress signals and is well-above the requirements of the National Underwriters Laboratories in many key areas.

ASC, the only licensed electrical low voltage Security company physically located in Washington, DC, is licensed, bonded, and insured in DC, MD, and VA. ASC operates the only security-oriented Customer Care Center in the District, located in the Georgia Avenue Gateway just steps from Walter Reed Army Medical Center.

Prospective customers are encouraged to visit our Center, view and test equipment options, see demonstrations and place orders.

ASC is a member of the Better Business Bureau of DC, the National Alarm Association of America, the National Burglar & Fire Alarm Association and the Security Industry Association.
