## ALARM SYSTEM TAKEOVER DISCLAIMER

ASC is happy to take over the monitoring of your alarm system. However, certain conditions apply that you should be aware of.

**We did not install this system.**

At the time we take over, we reset the control console's dialer to send signals to our Central Station. We test the system and send signals from its sensors to the Central Station - at that time we will determine whether all components are working.

**Any new equipment we add to this system, is warranted for one year, and the labor to install it, for ninety days, as stated in our Agreement.**

**However, we do not warrant or guarantee the function of any portion of the existing alarm system, including the control panel or its components, peripheral devices, wiring or batteries.**

If any portion of the existing alarm system fails **during or after** our takeover, the costs to troubleshoot then repair or replace devices, wiring or batteries, will be borne by the customer on a time and materials basis.

**I understand these limitations of liability and agree to them.**
